

Looking Closer Pays Off: The TEKU® AddedValues of the **Transport and Cultivation Trays D-ST Series.**

TEKU® D-ST Series Transport and Cultivation Trays: Why a lot of Small Details Are no Longer Just Small Details.

“A tray is just a tray”? Not with Pöppelmann TEKU®: Looking closer and discover TEKU® AddedValues.

Intelligent product design and the constantly high uniform quality of Pöppelmann products – often it's precisely the small details that make a big difference. In other words: precision work. That is the decisive advantage

of TEKU® Series D-ST. And it's the decisive factor for something else: your success.

Better plants – more than 30 years of horticultural experience. **Maximum efficiency** – the plastics technology know-how of Pöppelmann engineers and production on modern high-performance machines.

Effective sustainability – environmentally-friendly material management.

On the following pages you can learn more – discover the details of TEKU® AddedValues.

More Advantages for You All Round: Benefit from **TEKU® AddedValues** Every Day with the D-ST Series.

Better Plants.

Even watering

Precisely punched overflow holes combined with water channels ensure even watering during transport (standard version).

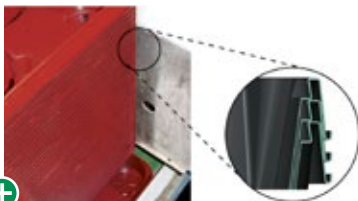

Reliable drainage

The holes in the bottom ensure reliable drainage during cultivation (B and D version).

Maximum Efficiency.

Easy destacking

With evenly-formed contours TEKU® trays are easier to separate quickly.

Better handling

The stable soft edge with deburred raw edge is especially user-friendly and reduces the risk of injury.

Stability

Special bottom, edge and water channels design to ensure higher stability.

Effective Sustainability.

Use of recycled materials

Careful preparation and intensive use of recycled plastics.

Select. Order. Profit.
