

Looking Closer Pays Off: The TEKU® AddedValues of the **MAK** and **MAL Hanging Basket Series.**

TEKU® Hanging Baskets from the MAK and MAL Series: Why a lot of small details are no longer just small details.

“A hanging basket is just a hanging basket?” Not with Pöppelmann TEKU®: discover TEKU® AddedValues.

Advantages for everyone: indoors and outdoors. With or without a saucer – often it's precisely the small details that make a big difference. In other words: precision work. That is the decisive factor for the quality of hanging baskets

from the MAK and MAL series. And it's the decisive factor for something else: your success.

How TEKU® AddedValues benefit you: **Better plants** – more than 30 years of horticultural experience. **Maximum Efficiency** – the plastics technology know-how of Pöppelmann engineers and production on modern

high-performance machines. **Effective sustainability** – management of environmentally-friendly materials.

On the following pages you can learn more – discover the details of TEKU® AddedValues.

1. MAK series hanging baskets

MAK series hanging baskets plus MUK series saucer with bayonet lock. Used in modern cultivation techniques, the multi hole star bottom provides the ideal conditions. Both on mobile tables and on the concrete floors.

2. MAL series hanging baskets

MAL series hanging baskets with overflow outlet offer a moisture reservoir for plants. Especially beneficial for crops that are grown hanging.

More Advantages for you all round: Benefit from **TEKU® AddedValues** every day with the MAK and MAL Series.

Better Plants.

Reduced cultivation time

The multi hole star bottom ensures rapid growth and healthy plants with ideal watering and drainage.

Optimal root growth

No need for internal stacking lifts – allows optimal root growth.

Healthy plants

Even watering with optimised overflow outlet or multi hole star bottom for reduced humidity in the greenhouse.

Maximum Efficiency.

Easily stacked

Stacked using the pot edge – for trouble-free stacking.

Easy denesting from the stack

Reliable stacking intervals and the high degree of stability of the sides ensure easy denesting from the stack.

Fast assembly

Saucer with patented bayonet lock for quick and easy assembly.

Better handling

Pronounced edge for better handling with automatic spacing systems.

Reduced labour costs

Perfect hanger fixing for fast and secure installation.

Reduced transport costs

The optimal diameter and improved fit increase loading quota per CC container.

Effective Sustainability.

Reduced weight

Unrivalled low materials usage thanks to continuous design optimisation.
